IT Support

Established in 2002, eQuad Technologies Sdn. Bhd. has been providing companies with leading IT solutions.

Proud of our strong client focus and long-term relationships, our aim is to work with our customers; embracing their business strategies to produce technologically relevant IT based solutions that convey their core values and key messages in a diverse and effective manner.

In addition to eQuad's own vast industry experiences and experts, we have a network of highly skilled business partners ensuring that our customers always have access to the appropriate solutions, making us the perfect choice to partner with to produce outstanding IT solutions on the *Microsoft .Net* framework.

Customised solutions for your business needs

OUR UNIQUE APPROACH

Nobody knows your business like you do. That's why we work with you to analyse your past successes and challenges while defining your needs and goals now and for the future. With that understanding in hand, we can build something to address your critical business challenges.

- We bring experience from an objective perspective
- We identify and formulate IT solutions with clear purpose

Our investment in research and development ensures that your IT solution can take advantage of new technologies, soon after it becomes available to help you retain your competitive edge.

CAPABILITIES & EXPERTISE

Our capabilities include:

- IT Solutions Development & Implementation
- Business Consulting
- Project Management

Our expertise spans a wide range of industries including financial services (insurance and banking), freight forwarding and logistics, distribution and warehousing, and manufacturing.

eQuad Technologies' comprehensive suite of services and solutions include

- Service Oriented Architectures (SOA) Consulting Services
- Portal and Content Management
- Database Analysis and Architecture
- Business Process Automation
- Data Collection Systems
- Track and Trace Systems
- Communication Systems
- Systems Integration and Migration
- Workflow and Business Process Management
- Verification and Validation Services
- Enterprise Value Chain Integration
- Security and User Management.

OUR VALUE

Sharing our industry expertise and experiences to empower you towards achieving your business goals and building the right IT solution for you.

Connecting your business to the technologies that you need

OUR PRODUCTS & SERVICES

EQUAD FLAGSHIP WAREHOUSE MANAGEMENT SOLUTION (iWMS™)

Inventory and warehouse management operations are key areas of concern for service and customer oriented companies. As accurate inventory information become imperative, cumbersome, error prone manual-based processes that translates directly to higher operating costs , excess inventory and failure to meet customer requirements

Designed for growing companies, eQuad Technologies' integrated warehouse management system (iWMS™) provides real time visibility and control over inventories across multiple physical as well as logical warehouse locations while automating manual based processes from procurement to shipment at an affordable start up price.

SOFTWARE & DATA CONVERSIONS

Systems that were appropriate at the time when they were written, tend to lose their lustre as time wears on. Businesses grow and expand, technologies advance.

There are many reasons as to why software become antiquated and unsupported.

Whether it is converting a legacy system into a modern web based system or converting a collection of spread sheets into a robust application, eQuad is present to provide that personalised service.

CUSTOM SOFTWARE

eQuad Technologies offers an assortment of IT solutions designed to meet the needs of any organisation. If you're looking for a partner who can execute your vision in ways you never thought possible, we're your choice.

CONSULTANCY

Consultants are available to conduct one-off projects, reviews, re-training and other business services as required. Again our emphasis is on providing business and industry expertise to support your organisation.

CUSTOM SOLUTIONS

Deliver measurable value, incorporating a broad range of technologies.

Customised solutions built to meet your specific business needs

WEB SOLUTIONS

eQuad's Web solutions bring together expertise in middleware integration, application servers, portal development framework and content management solutions using the latest Microsoft .NET framework
